WORK EXPERIENCE

31/08/1996 – CURRENT Rome, Italy

SOCIAL SCIENCE RESEARCHER NATIONAL RESEARCH COUNCIL OF ITALY

Researcher at CNR-IRPPS since 1996, she has experience with statistical methodologies and applications of statistics to population data. In particular, she deals with sampling design, opinion polls with CAWI, CAPI and CATI administration, epidemiological surveys, methods of data analysis, data mining, classic and fuzzy clustering, statistical teaching. She also deals with innovative teaching methods, youth condition, gender roles, gender equality, gender violence and scientific communication through social media. She is a member of CUG (Comitato Unico di Garanzia) of CNR. She was also member of SISTAN (Italian National Statistical System) for the sector of Population and family; life conditions and social participation. From 2013 to 2018 she was a contract professor of Statistics SECS01 for the Department of Social and Economic Sciences Faculty of Sociology - La Sapienza University of Rome. He is part of working groups at the central administration of the Italian National Research Council: drafting of CNR gender budget document and addendum to internal regulations for the protection of victims of violence at work.

Over the past 29 years, she participated to a large number of projects, both at national and international level, as statistic specialist and sampling designer. These projects range from research on young people, adults and the elderly, on gender differences, on the behavior and attitudes of the population, on the state of well-being and health.

PROJECTS

01/12/2022 – CURRENT

Evaluaction The project aims to carry out a social impact assessment of the 2014-2020 Strategy of UNAR (Anti-discrimination Unit of the Italian Presidency of the Council of Ministers) which has financed numerous projects dedicated to the inclusion of Roma, Cinti and Caminanti ethnic groups. It also provides the client with a guideline for evaluating the 2021-2030 Strategy

Loredana Cerbara is the principal investigator of the project

2019 – 2021

OsservAbruzzo Continuous detection of the activity of the Abruzzo CAVs. Experimentation of an information system for the detection of the activity of the Anti-Violence Centers of the Abruzzo Region in compliance with current legislation on confidentiality. (project under the responsibility of the undersigned financed by the Abruzzo Region)

Loredana Cerbara is the principal investigator of the project

2021 – 2022

Women's Hurdless The WOMEN'S HURDLES Erasmus+ project aims to raise awareness of the virtuous behaviors of women in terms of physical activity, well-being and health.

Loredana Cerbara is responsible for the IRPPS research group. The project coordinated by the Prevention and Protection Unit of the CNR

15/04/2021 – CURRENT

BRIDGES The BRIDGES Project (Building Reflexivity and response-ability Involving Different narratives of knowledGE and Science) is funded by the Cariplo Foundation on Funds earmarked for Social Research on Science, Technology and Society. It is a project that employs transdisciplinary and participatory research methods to understand and strengthen the relationship between science, society and ecological systems in the Italian context. To do this, it uses soil fertility as a case study, a topic of local and global interest but also complex and controversial, because its management and protection imply new relationships and visions between science, society, ecosystems and human and non-human actors.

The goal is to develop a reflective attitude in researchers, making them aware that they are a fertile resource for Italy but also that collaboration with artists, citizens and other local actors is today the only way to be responsible (i.e. able to answer) in situations of uncertainty and complexity, such as the pandemic we are experiencing.

Loredana Cerbara is responsible for the IRPPS research group. The project coordinated by IREA of the CNR

09/03/2020 – CURRENT

MSA-COVID19 Observatory on the social changes taking place during the health emergency from Covid19. The observatory carries out a series of surveys aimed at the population for the detection of the psycho-social effects of the health emergency that began in 2020.

Loredana Cerbara is co-head of a mixed research group CNR-INGV-University of Modena and Reggio Emilia and Onlus Child Foundation

2015 – 2018

PCTO ASL 2015-2018 Latina. Design and implementation of a project structure for the Alternanza Scuola Lavoro (ASL) in the three-year period 2015-2018 of the third, fourth and fifth classes of a State Scientific High School (Liceo E. Majorana di Latina)

The school-work alternation projects had the objective of fostering the dissemination of scientific culture in schools. In particular, statistics and social sciences and economics were considered. The object of the study is both the youth condition and the deepening of the role of the third sector and of all the services active in the area to facilitate voluntary projects aimed at promoting the growth of active and responsible citizenship

2015 – 2016

I giardini del Majorana The Majorana Gardens project, a space for integration, was funded by the Lazio Region with the aim of intervening, through the activation of laboratories and other accompanying

initiatives, in improving the integration between Italian and foreign students. In collaboration with Rotaract, Tempo Amico Association, E. Majorana Scientific High School, CAAF 50 and +, IRPPS Loredana Cerbara is the principal investigator of the project

Epidemiological investigation on the causes of visual impairments. The project involves carrying out an epidemiological survey (with visits to the area) in the city of Latina and in the Abruzzo region with a representative sample of the population aged 55 and over. The survey is mixed, CATI and face-to-face with administration of a questionnaire on lifestyles and an accurate eye examination. The project is a pilot project for the design of a national survey, with private and public funding. The work was requested by the WHO to fill an important information gap on visual impairments in Italy and is included among the projects of national interest at Sistan within the circle dedicated to health.

The IRPPS staff (Dr. Loredana Cerbara) participates in the drafting of the survey design, in the data processing and in the drafting of the final report and publications in scientific journals.

Participants: IAPB Italia Onlus (lead partner), Local Health Authority of Abruzzo, University of Chieti and IRPPS (Cerbara)

Funder: project co-financed by the partners

01/01/2014 – 30/09/2014

PE.NE.L.O.P.E. – PErcorsi e NEtwork per L'empOwerment e la Protezione delle vittime di violEnza

Realization of the contact person for the detection, archiving and processing of data relating to women welcomed by the anti-violence center of Pescara; in particular for the implementation of the following activities: request for authorization from the CNR to host the survey form of the Penelope project and the related database; indication of the procedure for authorizing data processing by the privacy guarantor; preparation of confidential access methods for the nodes of the anti-violence networks of Pescara and Vasto participating in the survey activities (preparation of reserved data entry areas and delivery of passwords for the different services); survey supervision and monitoring; processing of data entered in the reference semester (February - July 2014) divided by single territorial area under investigation (Pescara area and Vasto area)

03/2018 – 09/2018

SIBILLA SIBILLA - System of integrated actions for the strengthening of anti-violence centers in Abruzzo - CUP J91B17000120003, approved by the Department for Equal Opportunities with the Decree of the Presidency of the Council of Ministers of 25 November 2016, pursuant to the Public Notice "for the strengthening of centers anti-violence and assistance services for women victims of violence and their children and for the strengthening of the network of local services" Gazzetta ufficiale (General Series n. 56 of 8 March 2016)
