

PERSONAL INFORMATION

Lorenzo Paolo Corgnati

 ResearcherID: F-9666-2015

Sex Male | Date of birth  | Nationality Italian

JOB APPLIED FOR

WORK EXPERIENCE

2013 - present

Coastal Radar, Data Management and Stereo Vision Research Engineer
Tecnologo III livello – Matricola 17410

National Research Council of Italy (CNR) - Institute of Marine Science (ISMAR) in Lerici
Forte Santa Teresa, 19032 Pozzuolo di Lerici (SP), Italy

Research contracts

12/2018-present: Contratto TI, Protocollo CNR-ISMAR nr 8688 del 01/12/2018

04/2018-12/2018: Contratto TD, Protocollo CNR-ISMAR nr 0001368 del 22/02/2018

04/2017-03/2018: Contratto TD, Protocollo CNR-ISMAR nr 0001685 del 27/02/2017

Research grants

03/2016-03/2017: Assegno di Ricerca, Protocollo CNR-ISMAR nr 0000793 del 04/02/2016

03/2015-02/2016: Assegno di Ricerca, Protocollo CNR-ISMAR nr 0001532 del 18/02/2015

03/2013-02/2015: Assegno di Ricerca, Protocollo CNR-ISMAR nr 0000859 del 31/01/2013

Business or sector Oceanographic research

Main tasks include the management of the CNR-ISMAR Coastal High Frequency Radar (HFR) network for the monitoring of sea surface currents (2013-present), the technical coordination of the HFR data management within the European HFR Node (2018-present), the data management for oceanographic instruments and catalogues (2013-present), the 3D reconstruction of sea surface, marine waves, underwater environment and marine organism's detection (2013-2015).

Areas of responsibility:

Research and Development; Software Development; Infrastructure Manager; Scientific Production.

Assignments:

Technical coordination of the European HFR Node for the integration and harmonization services of international HFR data and for the distribution services of HFR data towards Copernicus Marine Service In Situ Ocean TAC (CMEMS-INSTAC), EMODnet Physics and SeaDataNet (SDN)/SeaDataCloud (SDC) marine data portals.

- *Team:* two researchers and two research engineers.
- *Role:* technical coordinator and software developer.
- *Methods:* collection, processing and distribution of standardized quality-controlled Near Real Time (NRT) HFR data towards CMEMS INSTAC, EMODnet Physics and SeaDataNet infrastructures. The performed activities consist in the design and implementation of all the software needed for the NRT data processing workflow and in the coordination and maintenance of the operational service for the creation and distribution of NRT HFR surface current data in standard format and compliant to a minimum set of Quality Control tests to the main European data distribution infrastructures.
- *Programming language:* Matlab, Python, bash scripts, xml, html, PHP
- *Tools:* M_Map libraries, HFR_Prog libraries, netCDF tools (NCO), THREDDS, MySQL.

- *Publications:* [4], [5], [6], [9], [13], [30], [32], [33], [34], [35], [36], [37], [48], [49], [50], [52], [53], [54], [55], [56]
- *Released software:* [58], [59], [60], [61], [62], [63], [64]

Contribution to the Service Evolution Task for the Integration of the HF Radar (HFR) in the CMEMS INSTAC.

- *Team:* two research engineers.
- *Role:* member of the working team.
- *Methods:* integration of quality-controlled Near Real Time (NRT) HFR data within the In Situ TAC products based on the INCREASE project recommendations. The performed activities aim to ensure a realistic calendar to start the provision of NRT HFR data in April 2019. The first task consists in organizing the Integration of the NRT HF Radar data in products such as Sea-In-Situ Near Real Time observations for first integration in V5 according to the recommendations produced in the INCREASE project. These include the delivery of standardized data with RTQC procedures. The second task consists in the support of the implementation of the production of NRT Total and Radial velocities of surface current that will be in place in a pre-operational mode in the INSTAC production unit for October 2018, and then delivered in V5 in April 2019 and V6 in April 2020.
- *Programming language:* Matlab, Python, bash scripts, xml, html
- *Tools:* M_Map libraries, HFR_Prog libraries, netCDF tools (NCO), THREDDS.
- *Publications:* [13], [30], [34], [35], [36], [37], [49], [50], [54], [55], [56]

Contribution to the PNRA National Antarctic Data Centre (NADC) project for the design and implementation of a distributed IT infrastructure to ensure the homogenization, management, long-term stewardship and sharing at international level of data, metadata and scientific information produced within PNRA.

- *Team:* one senior researcher, one research engineer, one research associate.
- *Role:* technical coordinator of the working team.
- *Methods:* design and implementation of a second-level node of the distributed IT infrastructure. This task consists in setting up a GeoNetwork instance, link it to the central node of the distributed infrastructure and populate it with standardized metadata of oceanographic datasets collected in Antarctica. This leverages on the metadata creation and standardization activity, carried on according to INSPIRE and GCMD metadata requirements.
- *Programming language:* Matlab, Python, bash scripts, xml, html, Java
- *Tools:* GeoNetwork, netCDF tools (NCO), THREDDS.

Definition of data and metadata interoperable formats and QA/QC procedures to be adopted as European standards for coastal radar applications within Italian flagship project RITMARE, EU projects JERICO-NEXT, INCREASE (CMEMS) and SeaDataCloud (SDC), EuroGOOS HFR Task Team.

- *Team:* three senior researchers, one technician and one research engineer.
- *Role:* member of the working team.
- *Methods:* definition of data and metadata formats compliant with CF-1.6, ACDD, Unidata Dataset Discovery and INSPIRE conventions. Definition of QA/QC procedures: QA procedures are based on IOOS best practices and QC methods are based on SNR, spatial geometry (GDOP) and statistics. The defined data and metadata formats and the QA/QC procedures are intended to be adopted as official European standards within the European HF Radar network and within the European services for delivery of NRT and historical HFR data (CMEMS and SDC).
- *Programming language:* Matlab, Python, bash scripts, xml, html
- *Tools:* M_Map libraries, HFR_Prog libraries, netCDF tools (NCO), THREDDS.
- *Publications:* [9], [13], [34], [35], [36], [37], [49], [50], [54], [55], [56]

Sea surface current monitoring using High Frequency radar

- *Team:* one senior researcher, one technician and one research engineer.
- *Role:* member of the working team.
- *Methods:* development of a control software tool for the data management, from data gathering at the sites to the final velocity data production. Realization of OGC compliant interoperable data format architecture (netCDF based) and management of a THREDDS catalog for data visualization and access. The data produced by the system are processed for quality control through signal to noise ratio analysis and GDOP analysis. Technical reports and scientific papers are produced.
- *Programming language:* Matlab
- *Tools:* M_Map libraries, HFR_Prog libraries, netCDF tools (NCO).

- *Publications:* [4], [5], [6], [7], [8], [9], [10], [11], [15], [16], [17], [19], [21], [31], [32], [38], [39], [40], [51]

Installation and data management of a High Frequency radar network for sea surface current monitoring

- *Team:* one senior researcher, one technician and one research engineer.
- *Role:* member of the working team
- *Methods:* installation of 4 sites of the radar network, from the infrastructure to the IT framework. Calibration of the antenna patterns is made through the use of a transponder moving along circular paths centred in the antenna sites. The network products are validated through the analysis of current velocity data sensed by drifters deployed in the radar coverage area and of Acoustic Doppler Current Profilers installed in the radar coverage area. Technical reports and scientific papers (peer-reviewed and conference proceedings) are produced.
- *Programming languages:* Matlab, bash scripts.
- *Tools:* Codar SeaSonde radars, transponder for calibration, drifters for validation.
- *Publications:* [4], [5], [6], [7], [8], [9], [10], [11], [15], [16], [17], [19], [21], [31], [32], [38], [39], [40], [51]

Design and implementation of a data management system for real-time retrieval and quality control of data collected from research vessels and automatic cruise report generation (<http://cruise.sp.ismar.cnr.it>)

- *Team:* one senior researcher, one technician and one research engineer.
- *Role:* member of the working team.
- *Methods:* development of a control software tool for the data management for data gathering at the research vessels, preliminary quality check, real time presentation on a web platform, complete Quality Control, automatic cruise report generation and production of final data in interoperable formats. Realization of a semantic framework (based on Resource Description Framework) for data and of OGC compliant interoperable data format architecture (netCDF based). The data processed by the system are collected by CTDs and Acoustic Doppler Current Profilers. The data produced by the system are processed for Quality Control according to the standards of the specific instruments. Technical reports and scientific papers (peer-reviewed and conference proceedings) are produced.
- *Programming language:* Matlab, Python, bash scripts, xml, html, MySQL, PHP.
- *Tools:* M_Map libraries, RDI WinADCP, RDI VMDas, netCDF tools (NCO), RDF, CSS.

Experimental design and implementation of an acoustic underwater point-to-point communication channel for dispatching operations.

- *Team:* one senior researcher and one research engineer.
- *Role:* leader of the working team
- *Methods:* operational test of the acoustic modems via Hyperteminal application, design and implementation of software tools for text string and image compression and binary coding, design and implementation of the software tools for controlling and synchronizing the two acoustic modems, installation and operation of the software tools onboard Raspberry Pi mini PC, test of the acoustic point-to-point network in tank and at sea. Technical report and is produced.
- *Programming languages:* Python, bash scripts.
- *Tools:* Pyserial libraries, Binascii libraries, Base64 libraries, Hyperteminal, Trittech Micron Data Modem, Raspberry Pi.

Design and implementation of a method for gelatinous zooplankton automatic recognition

- *Team:* one senior researcher and two research associates.
- *Role:* member of the working team
- *Methods:* image processing, feature extraction, Machine Learning, feature elimination. The developed method is based on the Elastic Net Tikhonov Regularization method and it allows for the training of predictive models for gelatinous zooplankton identification. The generated models automatically detect gelatinous zooplankton specimens in underwater images. The validation of the models is made in a cross-validation framework based on ground truth datasets. Technical reports and scientific papers (peer-reviewed and conference proceedings) are produced.
- *Programming language:* Python
- *Tools:* OpenCV libraries, L1L2 libraries.
- *Publications:* [1], [2], [3], [12], [14], [17], [22], [23], [24]

Design and realization of an autonomous underwater imaging system for the gelatinous zooplankton monitoring

- *Team:* one senior researcher and two research associates.
- *Role:* member of the working team
- *Methods:* design and realization of prototypes with high resolution cameras, Raspberry Pi mini-PC, lighting system, underwater case, battery pack. Development of calibration methods and software tools for the management of the camera firmware.
Software tools for calibration of the optical sensors are developed based on the pinhole camera model. Calibration activity is performed on the system sensors. Technical reports and scientific papers (peer-reviewed and conference proceedings) are produced.
- *Programming language:* Python, C++, LUA
- *Tools:* OpenCV libraries, CHDK, Canon SDK, Magic Lantern.
- *Publications:* [1], [2], [3], [12], [14], [17], [22], [23], [24]

Design and implementation of a method for 3D reconstruction of sea surface and wave field feature extraction aimed at the wave field spectral characterization:

- *Team:* one senior researcher and two research associates.
- *Role:* member of the working team
- *Methods:* calibration, rectification, disparity evaluation of the stereo data. Remapping of the point clouds into elevation domain. Pattern Recognition techniques for wave crests and troughs detection. Wave field feature extraction.
The developed method is based on the acquisition and processing of large datasets of images sensed in the visible band. The method results are validated through the acquisition of image datasets of a wave tank able to generate regular and irregular waves of known period, significant height and wavelength. Technical reports and scientific papers (peer-reviewed and conference proceedings) are produced.
- *Programming language:* Python, C++
- *Tools:* OpenCV libraries, Point Cloud libraries.
- *Publications:* [20]

Design and realization of a stereo vision system for the sea surface imaging aimed at the wave field spectral characterization:

- *Team:* one senior researcher and two research associates.
- *Role:* member of the working team
- *Methods:* design and realization of prototypes with reflex high-resolution cameras and adequate lenses. Development of calibration methods and software tools. Design of a mathematical model for the system design optimization.
Software tools for calibration of the optical sensors are developed based on the pinhole camera model. Calibration activity is performed on the system sensors. Technical reports and scientific papers (peer-reviewed and conference proceedings) are produced.
- *Programming language:* Python, C++
- *Tools:* OpenCV libraries, Point Cloud libraries.
- *Publications:* [20]

Shipboard on R/V SARS in Arctic Sea for the research cruise "PREPARED and Polar Plastics – EUROFLEETS 2"

- *Team:* 40-person crew.
- *Role:* member of the scientific crew
- *Methods:* preparation and deployment of 3 moorings for current, salinity, temperature, conductivity, sedimentary measurements.
- *Tools:* CTD, currentmeters, sedimentary traps, acoustic releaser, various probes.
- *Publications:* [57]

2007 – 2013 Film Company - 'Due Monete' (now DUEL:Film) - Founder and Joint Owner

Due Monete Snc
Via Ponzio 3, 10141 Torino (TO), Italy

Business or sector Movie production, advertisement

Communication and video company operating in scriptwriting and in the production of short films and videos for both advertising and individual client productions. The company also produces their own short films some of which have received international recognition and nominations at various film festival, most notably in the Cannes Film Festival for the film "Il Resto" in 2010.

Positions held

Executive producer (2007-2012)
Head of production (2007-2012)
Director assistant (2007-2012)
Camera operator (2007-2012)
Editor (2007-2012)
Colorist (2010-2012)

Areas of responsibility

As founder and joint owner of Due Monete my responsibilities covered many differing roles within the company: company management, fund raising, promotion, strategy planning, accounting, supply chain manager, head of production, post-production and motion graphics, distribution and teaching.

2001-2011 Forest Fires Early Warning Research Associate

Politecnico di Torino
Corso Duca degli Abruzzi 24, 10128 Torino (TO), Italy

Research grants

08/2009-07/2011: Assegno di Ricerca, Protocollo Politecnico di Torino nr 14078.VII.17 del 31/07/2009
08/2007-70/2009: Assegno di Ricerca, Contratto Politecnico di Torino nr 183/2007/AR del 31/07/2007

Business or sector Remote sensing research

Main tasks included the development of a Doppler excess prediction software in radio-occultation satellite link (2001-2004), the development of a predictive fire danger index evaluation system suited for alpine regions (2004-2006) and the development of an integrated monitoring system for wildfires monitoring and early warning (2007-2011).

Areas of responsibility:

Instrumentation development; Supply chain management; Software development;
Infrastructure manager; Promotion and outreach; Teaching activity; Scientific production

Assignments:

Design and implementation of a software for image rectification:

- *Team:* research team, consisting of myself and two PhD students
- *Role:* leader of the working team
- *Methods:* projective approach based on Digital Terrain Models and geospatial information.
- The developed method was based on the acquisition and the processing of large datasets of images sensed in the visible, near infrared and thermal infrared bands. The geo-referenced outputs were validated through comparison with ground control points in the monitoring coverage. Technical reports and scientific papers (peer-reviewed and conference proceedings) are produced.
- *Programming language:* Matlab, C++
- *Tools:* Digital Terrain Models, IDRISI GIS
- *Publications:* [25], [26], [41]

Design and implementation of a software for false alarm reduction in alpine forest fires early warning:

- *Team:* research team, consisting of myself and two PhD students
- *Role:* leader of the working team
- *Methods:* image analysis, pattern recognition, wavelet analysis and machine learning. The method is based on the acquisition and processing of large datasets of images sensed in the visible and near infrared bands. The results were validated using machine learning methods in cross-validation framework, based on ground truth data. Technical reports and scientific papers (peer-reviewed and conference proceedings) are produced.
- *Programming languages:* Matlab, C++
- *Tools:* OpenCV libraries.
- *Publications:* [18], [25], [41]

Design and implementation of a software for smoke detection in alpine forest fires:

- *Team:* research team, consisting of myself and two PhD students
- *Role:* leader of the working team
- *Methods:* image analysis, pattern recognition. The developed method was based on the acquisition and the processing of large datasets of images sensed in the visible, near infrared and thermal infrared bands. The software results were validated through the application of machine learning methods in cross-validation frameworks based on ground truth data. Technical reports and scientific papers (peer-reviewed and conference proceedings) are produced.
- *Programming language:* Matlab, C++
- *Tools:* OpenCV libraries
- *Publications:* [25], [41]

Design and implementation of a software for hot spot detection in alpine forest fires:

- *Team:* research team, consisting of myself and two PhD students
- *Role:* leader of the working team
- *Methods:* image analysis, pattern recognition and radiometric analysis. The developed method was based on the acquisition and the processing of large datasets of images sensed in the visible, near infrared and thermal infrared bands. The software results were validated through the application of machine learning methods in cross-validation framework, based on ground truth data. Technical reports and scientific papers (peer-reviewed and conference proceedings) are produced.
- *Programming languages:* Matlab, C++
- *Tools:* radiometric model developed by the team.
- *Publications:* [25], [41], [42], [43]

Design and implementation of an observing system for forest fires monitoring and early warning:

- *Team:* research team, consisting of myself and two PhD students
- *Role:* leader of the working team
- *Methods:* realization of prototypes through the modification of consumer cameras (IR filter removal and additional filters addition) and thermal cameras for Visible, Near InfraRed and Thermal InfraRed imaging. Realization of the control software for the integration with a pan-tilt system for the monitoring scan management. The prototypes were installed in a fixed station and on a mobile station (van with internal lab). The developed system was based on the acquisition of large datasets of images sensed in the visible, near infrared and thermal infrared bands. Software tools for calibration of the visible and infrared sensors were developed based on the pinhole camera model. Calibration activity was performed on the system visible and infrared sensors. Technical reports and scientific papers (peer-reviewed and conference proceedings) are produced.
- *Programming languages:* Matlab, C++
- *Tools:* consumer camera, modification of optical sensors, optical filters, pan-tilt engines.
- *Publications:* [25], [41], [43]

Design and implementation of a software forecast tool for fire danger index evaluation suited for alpine region

- *Team:* research team, consisting of myself and one thesis student
- *Role:* leader of the working team
- *Methods:* modelling extension of the Canadian Forest Weather Index (FWI) through the analysis and the modelling of climatological, orographic and vegetation conditions. Integration of numerical weather prediction data provided by ECMWF.

Land surface temperature data sensed by MODIS have been studied and analysed as a potential input for the model. Vegetation index data sensed by ATSR-2 and MODIS have been studied and analysed as potential input for the model. The model results were validated through the application of machine learning methods in cross-validation frameworks, based on ground truth data (historical forest fires time series). Technical reports and scientific papers (peer-reviewed and conference proceedings) are produced.

- *Programming languages:* Matlab
- *Tools:* ECMWF numerical weather previsions, GRIB data format, IDRISI GIS.
- *Publications:* [25], [27], [41], [43], [44]

Design and development of a software for GPS signal Doppler shift prediction in radio-occultation satellite link:

- *Team:* research team, consisting of a professor, a senior researcher and myself
- *Role:* member of the working team
- *Methods:* simulation of signal behaviour in radio-occultation satellite link, based on ray-tracing approach and Runge-Kutta solution for fourth order differential equations
- *Teaching* (Numerical analysis, radiometry)
- *Programming language:* Matlab
- *Publications:* [28], [29], [45], [46], [47]

1999 - 2006

Head of Production – film company

Associazione culturale Immagina
Strada Berteu 5, 10020 Casalborgone (TO), Italy
Business or sector Education, movie production, movie workshops

Short description of job title:

Festival coordinator (2003-2006)
Executive producer (2000-2006)
Editor (1999-2006)
Camera operator (1999-2006)
Workshop coordinator (1999-2006)

Areas of responsibility

Festival management; Fund rising; Promotion; Strategy planning; Accounting; Head of production, Post-production and motion graphics; Teaching.

2002 - 2005

Head of Guest Lodging Office

Cinemambiente Environmental International Film Festival
Via Montebello 15, 10100 Torino (TO), Italy
Business or sector Film Festival

Management of the Guest Lodging Office (2002-2005)

Areas of responsibility

Festival management; Drivers department coordination; Accounting; Supply chain manager; Festival organization

EDUCATION AND TRAINING

- 2020 Course in Julia programming
Coursera – University of Cape Town
 - Julia programming language

- 2019 ADCP Crash Course (by SINAPSI Interreg Project)
Università di Genova – DICCA Dipartimento di Ingegneria Civile, Chimica e Ambientale, Italy
 - Fundamentals of ADCP use, deployment and maintenance
 - Fundamentals of ADCP data processing and management

- 2019 WERA Operator Seminar
Helzel Messtechnik GmbH, Germany
 - WERA hardware structure
 - WERA site geometry
 - WERA software solutions

- 2019 I-STORM THREDDS workshop
National Research Council of Italy (CNR) – Institute of Marine Science (ISMAR), Italy
 - THREDDS architecture
 - THREDDS server deployment and maintenance
 - Metadata formats
 - THREDDS catalog management for data access and distribution

- 2017 Summer school on HF and X-band radars
ISSOR (International Summer School on Radio-Oceanography) at Université de Caen, France
 - Fundamentals for radio-oceanography
 - HF radar: technology, validation and measurements
 - X-band radar: technology and measurements
 - Data analysis for surface currents
 - HF radars for high tidal currents
 - Data analysis for sea states
 - Radio-oceanography: quality controls, coupling with other methods and applications
 - HF radar for tsunami detection
 - Data Assimilation

- 2016 Course in Monitoring the Oceans from Space
EUMETSAT by Imperative Space
 - Oceans and climate
 - Oceans, weather and climate impacts
 - Ocean transport and hazards
 - Living oceans (bio-geochemistry)
 - Oceans and us (socio-economics)

- 2014 School in Mediterranean Sea models, observations and experiments
National Research Council of Italy (CNR) – Institute of Atmospheric Science and Climate (ISAC), Italy
 - Ocean modelling
 - Operational oceanography
 - Lagrangian oceanography
 - Eulerian oceanography
 - Oceanographic geology
 - Ocean satellite observation

Common European Framework of Reference for Languages

Communication skills

- Good communication skills gained through my experience as a company owner and as a researcher.
- Good team working skills gained through my experience in research groups and as the head of production.

Organisational / managerial skills

- Leadership - experience as company manager, head of production and coordinator of educational activities.
- Organisational skills - experience in coordinating field experiments, as head of production and as festival coordinator.

Job-related skills

- Good command of production processes - experience as responsible of movie executive production.

Computer skills

- Proficient user of Microsoft Windows™ OS.
- Proficient user of Macintosh OS.
- Proficient user of Linux Ubuntu OS.
- Proficient command of Microsoft Office™ tools (MS Office, MS Excel, MS PowerPoint).
- Proficient command of LaTeX.
- Proficient command of MATLAB™.
- Proficient command of C and C++.
- Proficient command of Python.
- Advanced command of R.
- Advanced command of Julia.
- Proficient command of Visual Studio suite.
- Advanced command of HTML5 and CSS.
- Proficient command of PHP.
- Advanced command of MySQL.
- Basic command of IDL.
- Advanced command of IDRISI GIS.
- Proficient command of OpenCV library, PCL library.
- Proficient command of Final Cut Suite.
- Proficient command of Adobe Creative Suite.
