

Beatrice Vallone – Curriculum Vitae

| | |
|--|---|
| Address | Dip. Di Scienze Biochimiche, Università di Roma “La Sapienza”. P.le A. Moro, 5 00185 - Roma Italy |
| Telephone(s) | [REDACTED] [REDACTED] |
| Nationality | [REDACTED] |
| Gender | [REDACTED] |
| Work experience | |
| Dates | 03/2017-05/2017 Visiting Professor at Columbia University (New York USA) 01/2016-06/2016 Alexander Bodini Research Fellow at the Italian Academy for Advanced Studies in America – Columbia University (USA) 07/2014 - 06/2015 Research Scholar at Columbia University (New York USA) 2009-present Full Professor - Sapienza University of Rome 2000-2007 Associate Professor - Sapienza University of Rome 1991-1999: Staff Scientist - Sapienza University of Rome |
| Teaching Experience | 2000-Present Course of Chemistry and Biochemistry for the Degree in Medicine and Surgery at Sapienza (taught in Italian) 2010-Present Course of Chemistry and Introduction to Biochemistry for the International Medical School of Sapienza University (taught in English) 2020- Present Course of Biochemistry for the Course in Applied Pharmacological Sciences at Sapienza (taught in Italian) |
| Occupation or position held | Full Professor, BIO10 (Italian Ministry Discipline Group: Biochemistry and Biophysics). Appointed to teach Courses on Biochemistry, Molecular Biology, Chemistry for Medical Sciences, Biophysics, Protein Engineering |
| Main activities and responsibilities | -Director of the H2CU Interuniversity Center for International Training -Head of the Sapienza Structural Biology Group -Teaching chair of Biochemistry, Sapienza Faculty of Pharmacy and Medicine and Sapienza International Medical School -Member of the Advisory Committee for the CNR Cryo-EM Facility, 2018 -Member of the PSI-FELLOW program II 3i Advisory Board -Member of the Biological Macromolecules Commission of the International Union of Crystallography 2017-present -Chair of the committee “Biological Macromolecules” for the Italian Elettra Synchrotron 2017-Present -Member of the Executive Committee of the Italian Society for Synchrotron Light (SILS) 2013-2017 -Head of the CNR Biocrystal Facility (www.biocrystalfacility.it) 2012-2016 -Teaching panel of the Doctorate School in Biochemistry, 2013-present -Teaching panel of the Doctorate School in Biophysics, 2007-2013 -Member of the ESRF User Organizazion Committee 2010-2014 -Member of the “Accademia Medica Romana” 2010-present -Editorial Board “AIMS Biophysics” 2017-present -Review Editor Frontiers in Molecular Biosciences – Structural Biology 2014-present |
| Name and address of employer | Università di Roma “La Sapienza”, P.le A. Moro, 5. 00185, Rome, Italy. |
| Sector | Academic, research. |
| Education and training | |
| Title of qualification awarded | PhD in Biochemistry, 1991 Degree in Biology, 1987 |
| Name and type of organisation providing education and training | University of Rome “La Sapienza”, Academic |

Honors:

Schaefer Research Scholar at Columbia Medical Center (2014).

"Alexander Bodini" Research Fellow at the Italian Academy for Advanced Studies at Columbia (2016)

Short Fellowships.

1988 Geneva University (CH) sponsored by EMBO- Dept. of Biochemistry (Prof.S.J. Edelstein)

1990 LMB-MRC, Cambridge (UK) sponsored by EMBO (Dr. K. Nagai)

1991 LMB-MRC, Cambridge (UK) sponsored by FEBS (Dr. G. Fermi).

1997 York University, Dept. of Biochemistry (UK) sponsored by FEBS (Prof. J. Tame)

2004 Cambridge University, Dept. of Biochemistry, (UK) sponsored by EMBO (Prof. B. Luisi)

Appointments

Coordinates the Structural Biology group of the Department of Biochemical Sciences "A. Rossi Fanelli" (Sapienza-DSB), (PO Biochemistry, BIO / 10). Author of around 90 scientific publications in the field of biochemistry and structural biology, she worked at the Molecular Biology Laboratory of the Medical Research Council (LMB-MRC, Cambridge, UK), the University of York (UK), Cambridge (UK)), the University of Geneva (CH) and Columbia University (NY, USA) where he received the prestigious Schaefer Scholarship in 2014.

Member of the "Macromolecules" commission of the International Union of Crystallography and was elected member of the European Organization for Molecular Biology (EMBO) in 2020. She coordinated two European projects (ITN-MSCA and RISE-MSCA) focused on structural biology, leading two consortia of 10 international partners including universities, research institutions, large pharmaceutical industries (AstraZeneca) and SMEs.

Since 1 November he has been Director of the H2CU "Honors Center of Italian Universities" Interuniversity Center for International Training, which brings together 21 Italian Universities and 3 CNR institutes for the development of joint academic and research programs abroad.

Research.

Main research fields: structural biology, biochemistry and protein engineering.

H-Index 32. Citations 3549 Papers 101 (source Scopus)

The mechanism of action of proteins was investigated by using protein crystallography and biochemical characterization. This included the structure-function relationship of enzymes and transporters as well as their role within signalling networks that involves protein-protein recognition and complex formation.

The knowledge of the molecular mechanism exploited by proteins to carry out their function and involved in pathological processes is the starting point to design novel, targeted therapeutic strategies. In this contest, the main endeavour has been the determination of protein structures by protein crystallography and, more recently by single particle cryo-electron microscopy. Protein biochemical and biophysical characterization was carried out using a wide array of methods (kinetics, protein engineering, spectroscopy).

The most relevant results have been:

1. The study by single particle cryo-electron microscopy of engineered ferritins and of the complex between human ferritin and the CD71 receptor.
2. Structural and functional analysis of enzymes involved in antibiotic biosynthesis, that led to the determination of the structure of a new type of monooxygenase involved in the biosynthesis of aromatic polyketids and of P450 cytochromes involved in the biosynthesis of macrolide antibiotics, erythromycin and oleandomycin.
3. The determination of the structure of murine neuroglobin in different ligation states where a novel mechanism for ligand affinity regulation (heme sliding) was described and the characterization of its reactivity towards nitric oxide.
4. The study by time-resolved crystallography/wide angle X-ray scattering and molecular dynamics of myoglobin, hemoglobin and neuroglobin structural dynamics, that contributed to the description by direct detection of the pathway of ligands within the protein matrix and to the unveiling of a complex sub-nanosecond structural dynamics triggered by ligand dissociation.

Ongoing projects: integrative structural biology, biochemical characterization and engineering of i) ferritins as theranostics nanoparticles ii) Steroid 5- α dihydrogenases as oncogenes and pivotal membrane enzymes in neurosteroid biosynthesis iii) interaction between the oncosuppressor HIPK2 kinase and its target, p53.

Ongoing research is focussed on the structure-function relationship of proteins involved in human pathologies, also for theranostics designs:

1. SARS-CoV-2 antibodies for diagnostics and therapy in collaboration with Takis Biotech with the support of grants from Regione Lazio .
2. Antibody-based therapeutics and diagnostics in collaboration with Takis Biotech.
3. Complex of plasma proteins with their receptors (haptoglobin, ferritin and LDL-receptor related protein)
4. Steroid 5- α dehydrogenase membrane enzymes
5. Alsin ALS-2 GEF in collaboration with the Politecnico of Turin, with the support of a Telethon Grant

Grants

- **Regione Lazio Bando "Coronavirus ed oltre" Project Generas (GENErazione di proteine Ricombinanti e Anticorpi e per lo studio di mutanti del virus SARS-CoV-2) in collaborazione with Takis Biotech.**
 - **Regione Lazio Bandi Dottorato Industriale progetto "Anticorpi anti ErbB3 studi strutturali e funzionali mirati al disegno di farmaci oncologici".**
 - **In collaborazione con CNR-IBPM e Takis Biotech Dottorato Industriale Confindustria progetto "Anticorpi per diagnosi e terapia di varianti del SARS-CoV2"**
 - EU H2020 (2018-23) Marie Skłodowska-Curie Research And Innovation Staff Exchange (RISE) "ProMeTeus - Membrane protein integrated technologies development for drug design" (**Coordinator**).
 - EU H2020 (2014-18) Innovative Training Network "X-Probe" on frontier methods in protein structural dynamics (**Coordinator**).
- Fondazione Cenci-Bolognetti/Pasteur Institute Grant (2013-16) "Bacterial P450 Cytochromes as tools for designing novel antimicrobial agents" (**PI**)
- University of Rome "La Sapienza" (2012) "Espansione multidisciplinare della biologia strutturale verso una dimensione di facility: sistema di imaging per screening di cristallizzazione di proteine." (**PI**)
- CNR, Life Sciences Dept. "Biocrystal Facility of the CNR" (2012-15) (**Coordinator**).
- VII Framework Program (2008)- EU – "CryoEm structure of gamma secretase: a key component in Alzheimer neurodegenerative disease"- Scientist in Charge.

As Unit Member:

EuroBlood - European Framework Program VI in Blood Substitutes

PRIN 2007 Proteine redox in azione: dinamica strutturale, meccanismi e fisiopatologia

FIRB 2003 Biologia Strutturale PostGenomica, sviluppo di infrastrutture per la cristallografia di proteine.

Reviewer Activity.

MSCA Actions

European research Council

Swiss Excellence Program

French CNRS

Italian Ministry of Education and Research (MIUR) Young Researchers Excellence Program
