- Come organizzerebbe un evento di public engagement es. centenario CNR
- Come si può inserire un video YouTube in un sito web?

The Technology Transfer Innovation Programme (TTIP) activities included in the Emilia-Romagna innovation ecosystem proposal have the objective to promote industrial research as the main driver for sustainable economic development. TTIP includes opportunities for all ecosystem players - university and PHD students, researchers, innovative startups and research spinoffs, SMEs, corporates, civil society organizations and citizens, Public Administration - that will be able to give their contribution to the diffusion of green solutions making the region more sustainable, inclusive and attractive. Research-Industry collaborations will be encouraged in different ways: joint research opportunities, services for industrial research and the enhancement of human working capital will contribute to make the industry more competitive, to generate new businesses and employments, thus contributing to the overall resilience and competitiveness of territories.
